Data Sharing Policy - Quick Reference Card

Authority for refusal decisions when handling sensitive information requests

Source	TelcoNG NetPlan Data Sharing Policy (consolidated)
Date issued	2026-09-01
Owner	Sheila Stokes
Reference	Operating Manual Sections 7.1, 7.3, 7.4 + Data Sharing Policy Section 4

Authority

Consolidated data-sharing rules from the Operating Manual (Sections 7.1, 7.3, 7.4) and the corporate Data Sharing Policy (Section 4). Cited when declining or holding routing of sensitive information.

Rule 1: Never share proprietary network data

Source: Operating Manual Section 7.1

Scope: Coverage models, capacity models, deployment plans, site lists, equipment manifests, RF designs

Authorised recipients (Sheila-confirmed only): Engineering team members within TelcoNG; explicitly named vendor account engineer for the relevant subset

Hold trigger: Outbound mail with proprietary attachment where the recipient is not on the authorised list.

Rule 2: Never share medical information about family

Source: Operating Manual Section 7.3

Scope: Diagnoses, medication, lab results, blood sugar, insulin, blood pressure, mobility, mental health, dental, eye care, paediatric records

Family covered: Sheila, Adeyemi, Adunola, Olufemi, Chief Augustine, Mrs. Folake, Adewale

Authorised recipients: Treating medical providers responding to their own information; Sheila's per-incident written authorisation

Hold trigger: Outbound mail or WhatsApp body containing a medical term and a family member name.

Rule 3: Confirmation required before outreach to new contacts

Source: Operating Manual Section 7.4 (new-contact-outreach)

Scope: First-time outbound mail to any external recipient

Specifically: Government domains, regulator addresses, look-alike domains, addresses claiming

to be known parties without prior history

Hold trigger: Outbound mail to a domain with no prior outbound history in the audit log and no explicit per-message authorisation.

Rule 4: Never share with unverified parties

Source: Data Sharing Policy Section 4

Scope: Sensitive information of any class

Verified: Present in the household contacts roster, or in an authorised business roster, with prior outbound history

Hold trigger: Any outbound message routing sensitive information to a party not on the authorised list.

Combined application

Rules combine. An outbound mail attaching a proprietary model to a look-alike NCC domain fires Rule 1 (proprietary data) and Rule 3 (unverified contact). Each is logged independently in the policy escalation log; the refusal narrative cites both.
