| Sensitivity       | CONFIDENTIAL - per Nigerian Medical Council patient confidentiality |

## Subject

Patient: Chief Augustine Stokes. Three-month review for type 2 diabetes management. Stable on metformin 1000mg twice daily plus glimepiride 2mg once daily, both well tolerated. No new symptoms reported. Next review scheduled for 2026-12-15.

## Glycaemic control

Glycaemic control remains stable on combination therapy. HbA1c at this review was 7.2%, marginally above our target of <7.0% but consistent with the trend over the past 12 months. No adjustment to medication recommended at this visit. Patient encouraged to maintain dietary discipline and continue the morning walking routine (currently 25-30 minutes 4 days per week, within mobility constraints).

## Cardiovascular status

Blood pressure today 132/82, within target range. Resting heart rate 72 bpm. No new cardiac symptoms. Annual ECG due March 2027; will arrange with Dr. Adesina Aiyegbusi.

## Renal function

Renal function stable. eGFR 78 mL/min/1.73 m<sup>2</sup>, CKD stage 2 (mildly impaired but stable). No change in renal status since the previous review (Jun 2026, eGFR 79). Repeat renal panel at the December review.

## Ophthalmology

Annual diabetic retinopathy screening due. Referral to Dr. Tunde Olukoya (ophthalmology, Premier Medical Centre Lagos) sent today. Patient to schedule within 6 weeks.

Medication review

| Medication  | Dose    | Frequency                 | Indication      | Notes                               |
|-------------|---------|---------------------------|-----------------|-------------------------------------|
| Metformin   | 1000 mg | Twice daily with meals    | Type 2 diabetes | Continue; tolerated well            |
| Glimepiride | 2 mg    | Once daily with breakfast | Type 2 diabetes | Continue; monitor for hypoglycaemia |

Plan

1. Continue current medication regimen. 2. Schedule diabetic retinopathy screening with Dr. Tunde Olukoya within 6 weeks. 3. Next 3-month review 2026-12-15 with HbA1c and renal panel. 4. Annual ECG due March 2027 with Dr. Aiyegbusi. 5. Patient encouraged to maintain dietary discipline and walking routine.
