Subject: Community Objection to Proposed Cell Site at NSW-PHASE1-S03 (Lafia LGA, Akun Ward)

Dear Mrs. Ndukwe,

We write on behalf of the Akun Community Development Association, representing the residents of Akun Ward, Lafia Local Government Area, Nasarawa State. We received notice from your field acquisition team, led by Mr. Ifeanyi Okeke, on Tuesday September 22, 2026, that TelcoNG NetPlan proposes to construct a cell site at the location designated NSW-PHASE1-S03 within our community. While we appreciate the brief notification, we wish to formally register the community's objection to the proposal as it currently stands.

Our objection rests on three substantive grounds, set out below. We have raised these matters in the community council and they have the unanimous support of the elders. None of these matters are insurmountable; all are matters of process that the community would expect a serious operator to address before site preparation begins. We invite TelcoNG NetPlan to engage with us in good faith to resolve each one.

On a procedural note, His Royal Highness, the Chief of Akun, Chief Musa Adamu, has personally asked to be involved in any discussion regarding the use of community land. The Chief has held this position since 2007 and is the recognised traditional authority for the ward. No site construction on Akun land has historically proceeded without his consent, and we are unwilling to depart from that practice in this instance. The Chief was not consulted by your field team during the September 22 site visit, which has caused some surprise within the community council.

Our specific concerns are as follows:

1. Traditional leader engagement. The proposed site falls within land traditionally administered by the Akun Royal Council under the chairmanship of Chief Musa Adamu. The community council is not empowered to consent to commercial use of this land without the Chief's involvement. We require that the Chief be present at any consultation and that his consent be sought and recorded in writing.

2. Environmental and health concerns. Several residents have raised concerns about the radio emissions from the proposed cell tower, particularly regarding proximity to the Akun Primary School (approximately 180 metres from the proposed site) and the Akun Health Post (approximately 240 metres). We request that TelcoNG NetPlan provide written technical assurance that the installation will comply with the relevant electromagnetic-field exposure thresholds set by the Nigerian Communications Commission, with reference to the ICNIRP guidelines as adopted in Nigerian regulatory practice.

3. Land tenure and compensation. The proposed site sits within a parcel that has been used for communal grazing since at least 1962. We are not aware of any private title to the land. We require that TelcoNG NetPlan engage with the Akun Royal Council to negotiate either a community lease arrangement or a one-time compensation settlement to the community, the proceeds of which would be directed to a community development fund administered by the council.

We respectfully request a community consultation meeting at the Akun town hall on Saturday, October 10, 2026, at 11:00 AM to discuss these matters in full. We invite Mrs. Ndukwe and any colleagues at TelcoNG NetPlan deemed relevant to attend. We will arrange refreshments and the customary courtesies for our guests.

Until the Council has heard from TelcoNG NetPlan and the consultation has been held on Akun land in the presence of the Chief, no work is to begin at the site. We await your response.

Yours faithfully,

HRH Chief Musa Adamu

Chairman, Akun Royal Council; Acting on behalf of the Akun Community Development Association
For and on behalf of the Akun Community Development Association

cc: Hon. Chairman, Lafia LGA; District Head, Akun Ward; Federal Ministry of Communications and Digital Economy
