

CBD INTERFERENCE ANALYSIS SUMMARY

REVISED VERSION - FOR SPECTRUM HEARING

Document Status: Revision Prepared for Hearing (*supersedes earlier draft*)

Hearing Reference: NCC/SPM/5G/2026/0173

This revised interference-analysis summary presents the latest technical assessment for the CBD small-cell deployment and supersedes earlier draft versions prepared during review.

Analysis Area	Result	Status
Co-Channel Assessment	18.4 dB C/I margin	Pass
Adjacent Channel Review	Within Threshold	Pass
Urban Density Check	Reviewed	Pass
Mitigation Validation	Completed	Pass

The 18.4 dB C/I margin shown in the Co-Channel Assessment row is the primary value referenced during hearing readiness review. All technical findings in this revision reflect the *latest assessment*.
